PROJECTS

Yankee Pie A Pizza Developed a full-stack pizza delivery app for Yankee Pie A Pizza, enhancing user experience through an intuitive interface, real-time order tracking, and integrated secure payments, boosting customer satisfaction by 40% and sales by 25%. [\(Try it here \(android\)\)](#)

Smart Checkin. Developed a comprehensive employee management application featuring biometric-based check-in/check-out, real-time performance tracking with graphical visualizations, and seamless communication through Agora-powered video/voice calling and chat functionality. Implemented a custom backend for robust data management and analytics, facilitating effective team collaboration and productivity monitoring.

Islmic Quiz. Developed an engaging Islamic quiz app designed to enhance users' Islamic knowledge through interactive quizzes, a gamified points and level system, and in-app purchases for premium content. Integrated AdMob for monetization and ensured an intuitive user experience for seamless learning and enjoyment.
